The Admissions Committee
IHE Delft Institute for Water Education
Delft, The Netherlands

Dear Members of the Admissions Committee,

I am pleased to recommend Stanley Chukwuebuka Okonkwo, a master's student specializing in Ecology and Nature Management at RUDN University. He is applying for the Research MSc in Water Hazards, Risks and Climate (Digital Innovation and Hydroinformatics profile) at IHE Delft.

Stanley consistently demonstrates a keen understanding of complex environmental issues and a genuine passion for sustainable development. His master's thesis analyzes the ecological impacts of urbanization on green spaces and drainage patterns in Lagos State, Nigeria, using GIS and remote sensing analysis. This is directly relevant to your programme — rapid urban growth in Lagos has created serious drainage failures with consequences for flood risk. His proactive engagement in research has resulted in two peer-reviewed publications on geotechnical investigations and GIS-based waste management analysis. He has also presented his research at international conferences, including the Lomonosov Moscow State University conference. He also built EcoSim, a web-based ecological simulation of West African biomes, reflecting Stanley possesses strong analytical skills, intellectual curiosity, and dedication to addressing environmental challenges in his home country. His combination of geological field experience and advanced technical skills in GIS, remote sensing, and cloud data processing makes him exceptionally well-prepared.

I strongly support his application for the IHE Delft Research MSc. I am confident he will excel in the programme and contribute meaningfully to

research on urban water systems and environmental monitoring.

Thank you for your consideration.

Yours Sincerely,
Margarita Redina, Dr. Econ., Assoc. Prof.
