

STANLEY OKONKWO

Lagos, Nigeria | +79688920221 | okonkwostanley67@yahoo.com | [LinkedIn](#) | [GitHub](#)

Career Summary

Full-stack engineer with 6+ years of experience designing and delivering scalable web applications using Node.js, C#, .NET Core, TypeScript, React, and Angular. Skilled in building RESTful and GraphQL APIs, automating CI/CD pipelines, and managing cloud infrastructures on AWS and Azure. Proven track record of driving efficient feature delivery and improving system performance across fintech, e-commerce, and logistics domains in agile teams.

Skills

- **Programming Languages:** C#, JavaScript, Python, Php
- **Frameworks and Libraries:** .NET Core, Angular, Django, EF Core, Asp.net, Laravel, Node.JS, React
- **Database:** MYSQL, PostgreSQL, MongoDB, DynamoDB, T-SQL, RedShift
- **Technologies:** REST APIs, Microservices, Jenkins, Kubernetes, Docker, RabbitMQ, AWS, Azure, CI/CD
- **Soft Skills:** Communication, Leadership, Problem-Solving, Analytical, Detail Oriented, Critical Thinking
- **Related Skills:** Data engineering, Cloud Engineering, Product Management, DevOps, Technical Writing

Work Experience

Mobr **Jul 2024 - Apr 2026**
Full-Stack Software Engineer / Devops Engineer *Marseille France (Remote)*

- Developed secure and scalable RESTful APIs using .NET Core to support a car rental mobile application, enabling efficient data flow between frontend and backend services.
- Architected and optimized a web-based admin dashboard using Angular and TypeScript, enabling admins to manage vehicle listings, track rentals, and monitor customer interactions in real time.
- Built a real-time reporting module tracking vehicle availability, booking trends, and revenue metrics, improving operational visibility for business stakeholders.
- Integrated Google Maps API for live vehicle tracking and Stripe for payment processing, improving transaction reliability and real-time location accuracy.
- Automated AWS and Azure DevOps CI/CD pipelines using Docker, Jenkins, and Kubernetes, reducing deployment time by 35% and accelerating feature release cycles.

FlatPurse **Sep 2023 - May 2024**
Backend Engineer (C#, .Net Core, Docker, AWS, Azure) *Ontario Canada (Remote Contract)*

- Contributed to backend development of an online POS and e-commerce platform using .NET Core and C#, designing clear RESTful APIs and implementing GraphQL endpoints for internal dashboards.
- Designed and optimized system architecture with a focus on scalability, performance, and long-term maintainability, including schema design and indexing for PostgreSQL.
- Implemented a real-time data streaming pipeline using Amazon Kinesis, AWS Lambda, and Amazon QuickSight, delivering a live metrics dashboard that supported data-driven decision-making.
- Integrated Serilog for structured logging, improving issue resolution efficiency and system performance monitoring.
- Authored API architecture documentation and event flow diagrams, reducing cross-team dependencies and improving alignment with the mobile development team.

Tenece Professional Service **Feb 2021 - Aug 2023**
Software Engineer (C#, .Net Core, Azure, TypeScript & Angular) *Enugu, Enugu State, Nigeria*

- Developed an automation solution for data synchronization within an educational institution, reducing manual tasks by 75% and improving operational efficiency.
- Built a B2B order management system for tracking large-scale deliveries, enhancing logistics operations for improved supply chain management.
- Collaborated with cross-functional teams to gather and analyze requirements, design software solutions, and implement features, contributing to a 30% faster project delivery through clear TypeScript interfaces and API contracts.
- Implemented a data access layer using Entity Framework and SQL Server, achieving a 40% reduction in database query execution time and a 50% increase in data retrieval time.
- Conducted code reviews, and author technical documentation, This involved regular peer reviews, knowledge-sharing sessions, and hands-on guidance for junior team members
- Configured Azure DevOps CI/CD pipelines for Angular and .NET Core applications, enabling automated testing and deployment to Azure App Service.

Genesys Tech Hub **Jan 2020 - Nov 2020**
Junior Software Developer *Enugu State, Nigeria*

- Engineered a robust backend architecture for a fitness tracking application using Node.js and Express, incorporating real-time data processing with Socket.io and scalable storage solutions that improved user engagement and performance.
- Led cross-functional teams to deliver insurance, courier, fintech, and e-commerce applications, deploying to AWS infrastructure using Jenkins, Docker, and Kubernetes for container orchestration.
- Contributed to an agile team building the backend infrastructure for a revenue assurance solution used by one of Nigeria's premier banks, focused on enhancing revenue efficiency and reducing financial discrepancies using Node.js microservices.
- Actively participated in agile ceremonies including sprint planning, retrospectives, and daily stand ups to maintain effective team communication and delivery cadence.
- Engineered a finance planner for SMEs using Node.js, designed to aggregate yearly invoices and integrate with SAGE accounting software via RESTful APIs.

Tek-Experts

May 2018 - Sep 2018

Technical Support Intern (Remote)

Lagos State, Nigeria

- Provided technical assistance to Tek-experts's client base, averaging over 200 clients per month. Successfully resolved 95% of issues on the first contact, ensuring high satisfaction.
- Effectively managed and prioritized a ticket queue of up to 50 support requests daily.
- Achieved an average resolution time of 24 hours, meeting and exceeding company SLAs.
- Developed and updated comprehensive knowledge base articles, enhancing self-service capabilities for clients. This effort increased self-service resolution rates by 25%.
- Coordinated closely with engineering and product teams to escalate and resolve complex technical issues. This collaboration led to a 30% reduction in recurring problems.
- Collected and analyzed customer feedback to identify common pain points and areas for improvement. Implemented changes based on this feedback, enhancing overall quality.

Education

People's Friendship University of Russia, Moscow, Russia

2024 - 2026

M.Sc., Ecology and Nature management

Moscow, Russia

Nnamdi Azikiwe University, Awka, Anambra State, Nigeria

2015 - 2019

B.Sc., Geological Science

Awka, Anambra State, Nigeria

- Product Manager Certificate of Completion, Entry Level: 2022 - Verify Here: <https://entrylevel-public.s3.amazonaws.com/certificate/5d8c1d71-d8e5-491c-bf0e-59912be626b4/c1d4cf3c-c9d6-42bd-945b-b28f6a01a6c7.p>
- Cloud Developer Certificate of Completion: Udacity, 2021 - Verify Here: <https://graduation.udacity.com/nd9990>

Personal Projects

Scan Drift [Live Link](#)

- Built a scalable PDF scanning tool with a TypeScript-based Node.js/Express REST API and React frontend, leveraging NestJS for modular service layers
- Containerized the application with Docker and configured CI/CD pipelines in Azure DevOps for automated testing and deployments

Website Cloner [Live Link](#)

- Developed a full-stack website duplicator using a Node.js/Express API with Puppeteer for headless page scraping and a React frontend for previewing cloned layouts
- Implemented RESTful endpoints to fetch and store HTML/CSS assets, ensuring efficient caching and quick retrieval for designers

VirtualGallery [Live Link](#)

- This is a 3D virtual gallery that offers immersive and interactive experience while visualising images in multi 3D environments.

Agrichub [Github](#)

- This is consultancy platform that offers Agro entrepreneurs and experts an opportunity to transact in a secured and escrow-based approach while maintaining reliability and trust.

EcoSim [Live Link](#)

- A web based interactive simulator game build to educate students about environment and how to remediate and recover a damaged ecosystem.

Technical writing [Link](#)

- on Medium.com. Popular articles include topics on C#, .net, Python, DevOps, etc.
